2. Qualitative Information on Changes in Consolidated Business Performance

A. Overview of Performance

Looking at the Japanese economy during the third quarter of Fiscal 2005, according to the Bank of Japan's Tankan Survey released in December, the business conditions index, which indicates corporate economic sentiment, increased to 21 points on firm domestic demand and an improvement in exports, a rise of two points compared to the previous survey in September, for a third straight quarter of improvement. In addition, the Diffusion Index (DI) for October 1995, released by the Cabinet on December 7, moved up for the third successive month since August, and the Composite Index (CI), which shows the strength of economic trends, is also recording all-time highs during the current expansion phase, after hitting a low in January 2002. Factors such as these show that strong corporate earnings are having a positive effect on household budgets, bringing about a recovery in consumption, although some risks remain, including corporate earnings being forced down by sharp rises in crude oil prices and a sudden slowdown in the US and Chinese economies.

In this economic environment, bad debt expenses in the consumer finance industry are on the decline, with the number of applications for personal bankruptcy as published by the Supreme Court registering year-on-year declines for 25 months in a row since November 2003.

Nevertheless, there is increasingly stiff competition for share in the overall consumer credit market with an expansion in operational tie-ups that transcend industry boundaries, IT companies entering the finance industry, and credit card companies strengthening their cash advance operations.

In this operating environment, the AIFUL Group is seeking to develop its business based primarily on the unsecured loan sector while aggressively expanding into the home equity loan, small business loan and credit card sectors. Further, it is widening its focus from the traditional retail sector, which targets loans for individual customers, to a more broadly defined retail sector that encompasses business loans for small and medium enterprises.

The AIFUL Group has continued to promote diversification of products and sales channels based on its multiple brand strategy to cater to a wider range of customer needs, while securing stable growth potential and profitability into the future and striking a balance between risk diversification and further development. Moreover, each company that belongs to the Group has also been striving to develop efficient operations while working together to generate synergistic effects and strengthen relationships within the Group.

During the quarter beginning in October 2005, there were 129,000 new applications, up 6% year-on-year, and there were 85,000 new account acquisitions, up 4.0% year-on-year, putting the brakes on the decline which had persisted since the year ended March 2003. A. Basic Stance with Regard to Corporate Governance

The AIFUL Group considers speed in decision-making, the establishment of management supervisory functions, and the reinforcement of compliance and disclosure to be its basic policies for the enhancement of corporate governance.

Its corporate governance, business execution, management supervisory and internal controls, and risk management systems are as indicated in the diagram below.

B. AIFUL's Business Execution, Management Supervisory and Internal Controls, and Risk Management Systems

In a measure aimed at speedy management decision-making, the AIFUL and LIFE Boards of Directors meet weekly (Boards of Directors meet monthly at other group companies) to fully discuss and examine management issues and business opportunities facing the companies, as well as strategies to address them. Speedy management decisions follow these discussions.

In its efforts to enhance legal compliance, AIFUL has had an Inspection Department, an Internal Audit Department, and Legal Department, in charge of preventative legal affairs, in place for some time. In addition to this, the Company established a Compliance Committee, which includes lawyers and other external members and serves as a consultative body for the Board of Directors, in April 2002. At monthly meetings, the Compliance Committee gathers risk information, implements preventative measures, and conducts employee education based on the committee guidelines, working to reinforce compliance systems throughout the whole Company.

In addition, AIFUL has established a new Compliance Office, an organization dedicated to conducting ongoing examination and assessment of these issues on a company-wide basis to ensure that the compliance system continues to improve and that appropriate corporate ethics take root group-wide.

With these efforts, AIFUL is appropriately synchronizing information with other group companies and working to enhance the group's overall compliance system.

On October 1, 2005, the Company established the AIFUL Group Compliance Committee as the apex organization for the Compliance Committees at each Group company, aiming to ensure common corporate ethics for the Group overall and the establishment of an overall compliance system.

The AIFUL Group's system for ensuring the appropriateness of financial information consists of the prescribed checking procedures in the Accounting Department and audits based on the Commercial Code and the Securities and Exchange Law. Apart from this, AIFUL has long maintained an organizational structure based on the separation of the division in charge of financial accounting (Accounting Department) and the division in charge of management accounting (Management Planning Department), which provides a system of checks and balances.

Moreover, the Company's efforts to ensure appropriateness in financial reporting include additional checks made in advance of the disclosure of financial reports by related departments, including the Investor Relations Office, the Public Relations Department, the Legal Department, and the Management Planning Department.

d. Enhancing Disclosure and Internal Control

AIFUL believes that appropriate disclosure of business information will make external monitoring of management more effective. Its activities include maintaining an investor relations web site, disclosing information through press releases, settlement data books, annual reports and similar materials, as well as providing information and briefings for the domestic and foreign mass media, investors and analysts.

AIFUL also provides regular feedback to the president, Board of Directors' meetings and departmental managers on the opinions and desires of investors in its efforts to enhance disclosure.

ii) Establishment Status of Risk Management System

With regard to its risk management system, AIFUL has established a system in which the Risk Management Committee within the Management Planning Division primarily gathers information on latent and apparent risk factors within the Company, and conducts crisis management in cooperation with related departments, including the Investor Relations Office, Public Relations Department and Legal Department.

Moreover, in response to the Personal Information Protection Law, which came into force on April 1, 2005, the Company launched a project in April 2004 to prevent the leaking of information, carrying out a review of the proper handling of personal information and company-wide security management measures to prevent the leakage of personal information before it happens in terms of the human, organizational and technical aspects and establishing a system to prevent the disclosure of personal information.

Moreover, AIFUL has prepared an action plan for when problems relating to personal information or corporate information arise at the Company or at Group companies, and has set up a new Information Management Contingency Plan, for which the Information Management and Administration Office within the Management Planning Department is responsible, with the aim of addressing emergencies properly and promptly, thus establishing a strong system for responding to emergencies.

iii) Internal Auditing and Auditing System and Status of Auditing

With regard to the management supervisory function, AIFUL employs an auditor system, which has four auditors, including three external auditors. The auditors not only supervise management through attendance at the weekly Board of Directors meetings at AIFUL and LIFE, but also attend the Compliance Committee and work in close cooperation with the Inspection Department, the internal audit department, to firmly implement the auditing system. Moreover, the auditors of the Company and each group company work in conjunction with the Group Company Control Section and the Inspection Department to provide the auditing system for Group company audits, as well.
